

Installation and Maintenance Instructions for Aquadecor Additional Items (Logs, Rocks, Leaves, Driftwood, Vines, etc.):

1. **Unpacking and Rinsing:**
 - Carefully unpack the Aquadecor additional items.
 - Rinse the items thoroughly with hot water to remove any dust or debris.
2. **Placement in Tank:**
 - The washed product can be placed directly in the aquarium.
 - The tank can be either empty or full during installation.
3. **Careful Placement:**
 - Handle the items with care to avoid potential damage to the tank and the fish.
 - Products can be rearranged to create various setups and designs within the tank.
4. **Regular Tank Maintenance:**
 - During regular tank maintenance, wash the Aquadecor items along with other equipment.
 - Rocks and logs with caves should be rinsed well to remove any stagnant water.
5. **Algae Cleaning:**
 - If algae appear on the items, clean them with a soft brush during maintenance.
 - Regular cleaning prevents heavy algae buildup and potential damage to the product.
6. **Porosity Consideration:**
 - The product is porous, making it susceptible to staining.
 - Avoid using foods with red, yellow, or similar pigments, as well as colored water treatments and fish medications to prevent staining.
7. **Removing Products During Treatments:**
 - When using treatments with coloring agents, including water treatments and fish medication with dyes and pigments, remove the Aquadecor items from the tank to avoid staining.
8. **Stain Prevention:**
 - Be mindful of any colored substances that come into contact with the Aquadecor items to prevent staining.
 - Regularly monitor the tank conditions and adjust feeding and treatment practices accordingly.
9. **Enjoy Your Aquascape:**
 - Once installed and properly maintained, the Aquadecor additional items enhance the aesthetic appeal of your aquarium.
 - Regular care and attention will ensure the longevity and visual attractiveness of the aquascape.
